ThermOstatic Valve and High Temperature Shower Column

Copper Fittings

Solar Lawn Lamp

Concise design reflects the beauty of the science and technology; expresses the combination of the structure and environment.

Solar module power: 3-9W

LED power: 1-3W

Lighting days without sun: 7days

The lamp height:700mm

Concise design reflects the beauty of the science and technology; expresses the combination of the structure and environment.

Solar module power: 3-9W

LED power: 1-3W

Lighting days without sun: 7days

The lamp height:700mm

Solar Music Lawn Light

Small Solar Lawn Light

Type: Solar scarecrow lawn lamp

Height: 700mm

Material: metal

Concise design reflects the beauty of the science and technology; expresses the combination of the structure and environment.

Solar module power:4.6W

The lighting days without sun: 7days

The light power:1W

Height:700mm

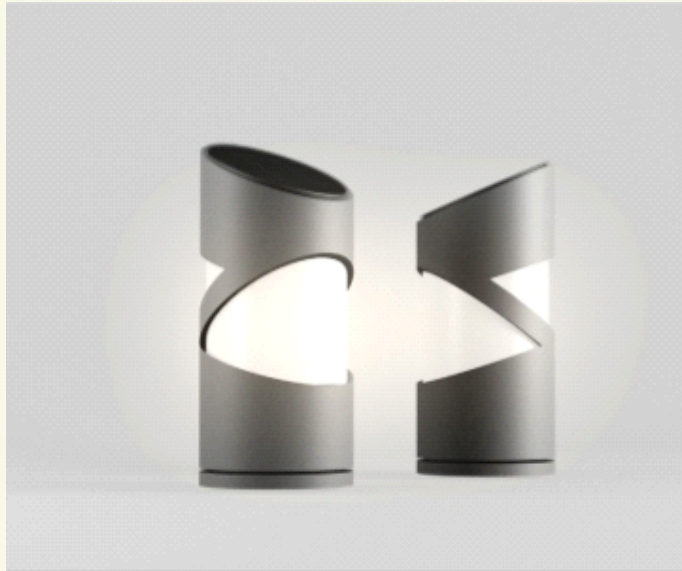

Solar module power:4.6W

The lighting days without sun: 7days

The light power:1W

Height:500mm

Solar module power:3.2W

The lighting days without sun: 7days

The light power:1W

Height:500mm

## Solar mosquito killer lamp

Features: light control, timing control, auto switch, and high voltage protection. It's an innovative, advanced, and high-level automatic new product.

## Winpin Energy-saving Glass

Sunflower Spring

Solar Water Flow Spring

Lotus Water Flow Fountain

Solar Rockwork Water Flow

NO. 90903

SIZE: 140\*81\*108CM

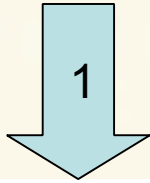

Solar Rockwork Water Flow

Villa

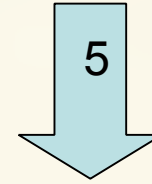

Balcony

Individual

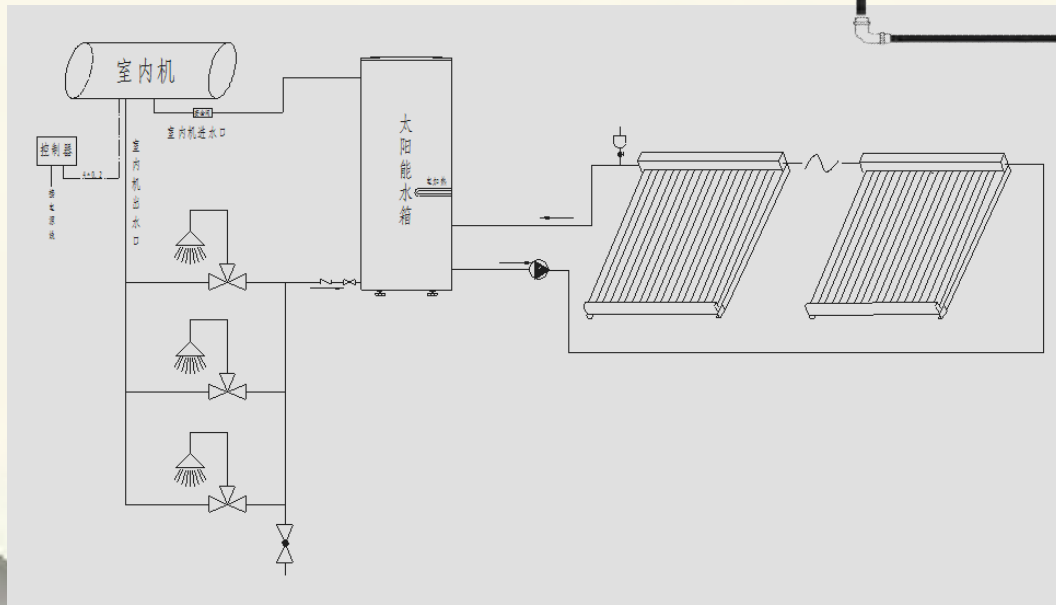

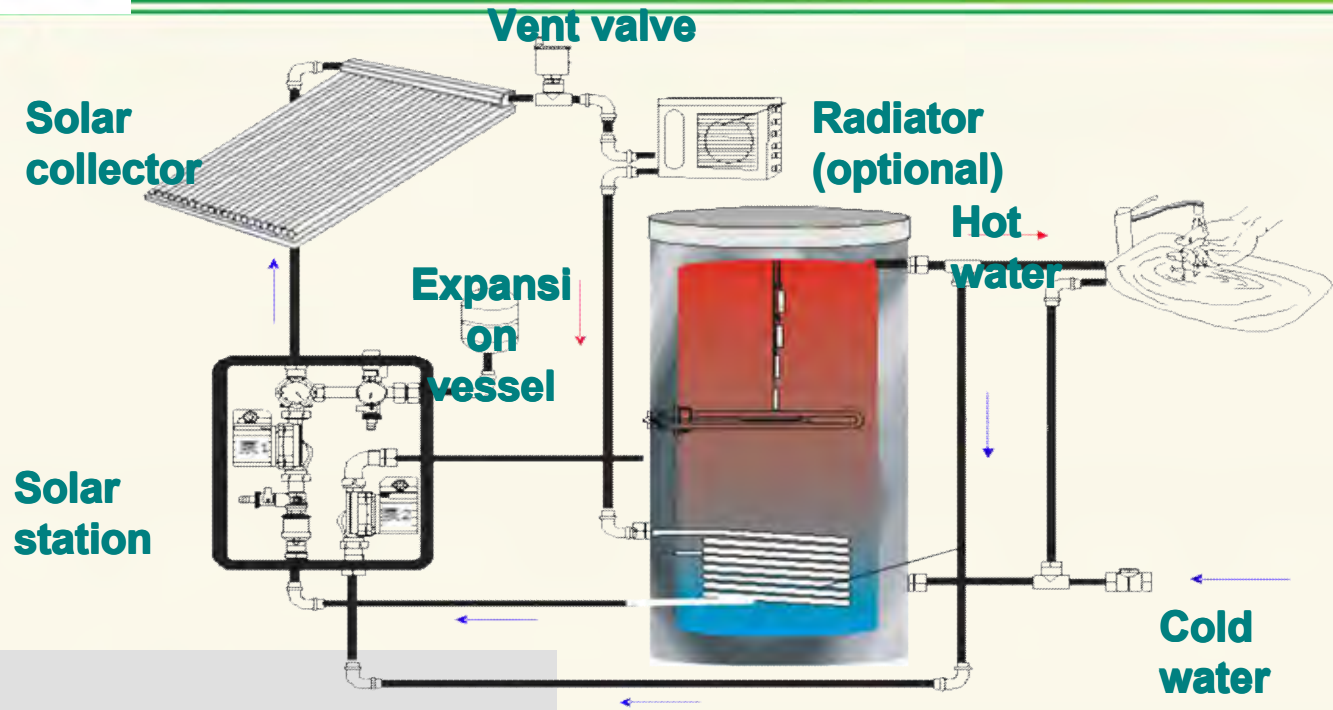

Solar water heater

PCM

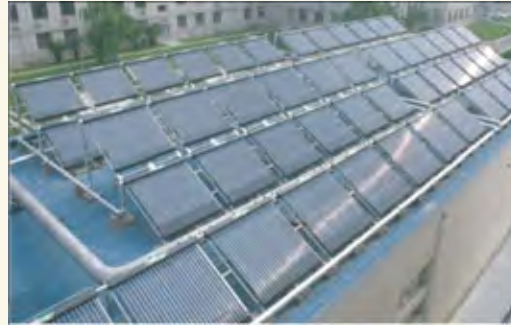

Split System

## Water Tank

1. double anti-corrosion protection: electron anode and magnesium rod;
2. seamless welding of inner tank;
3. 50mm insulation layer, once foaming at high temperature process.

## Solar Collector

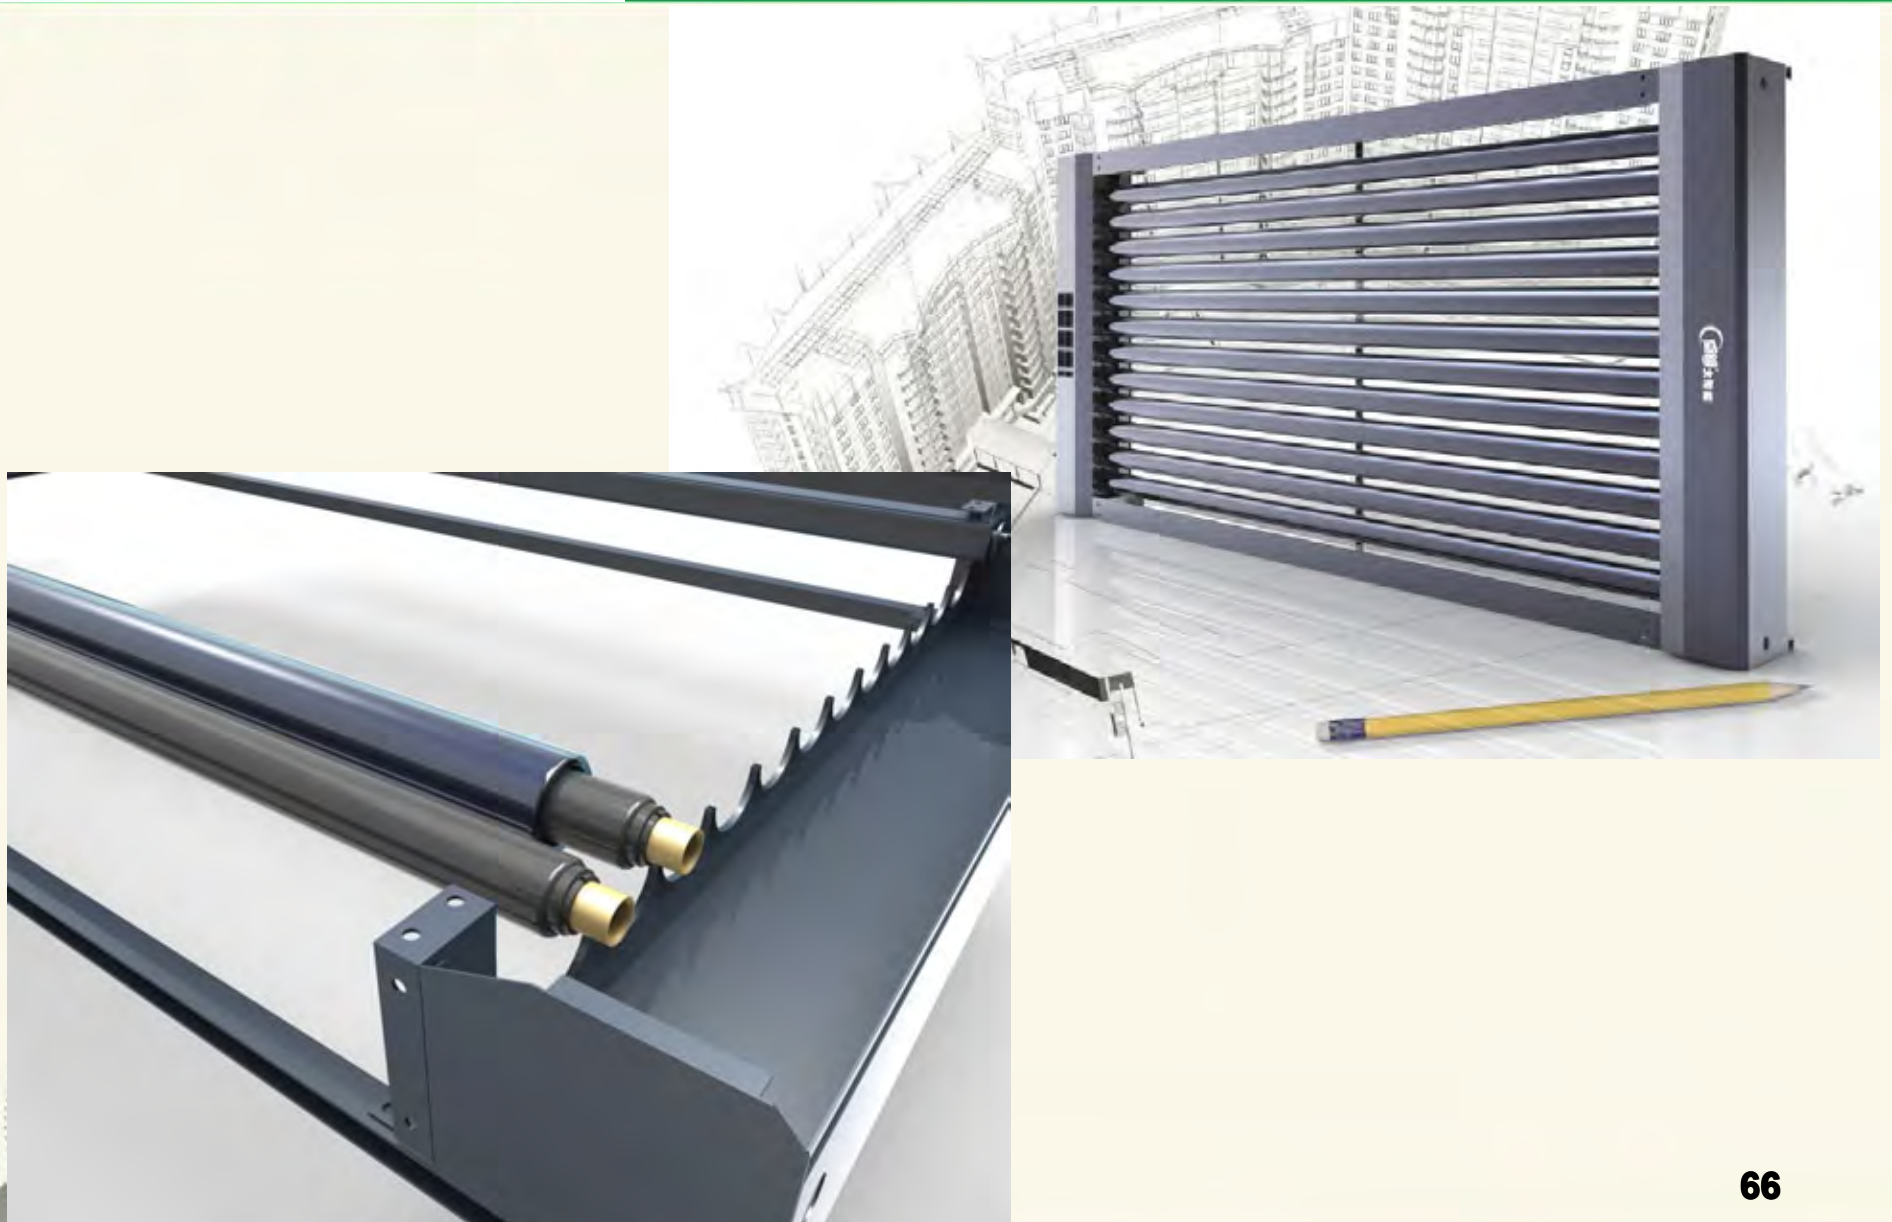

1. core technology-- magnetron sputtering interference coating;
2. absorptance ratio  $\geq 97\%$ , emission ratio  $\leq 6\%$ , the interference film changes a little when temperature rises up;
3. national standard of vacuum:  $10^{-2}$ , Himin vacuum degree:  $10^{-4}$ , long life;

## System

1. special design for individual house in collective heating, three water mode and two optional heating time are available, more intelligent;
2. small heat exchanging inner tank, bearing more pressure

## PCM Split System

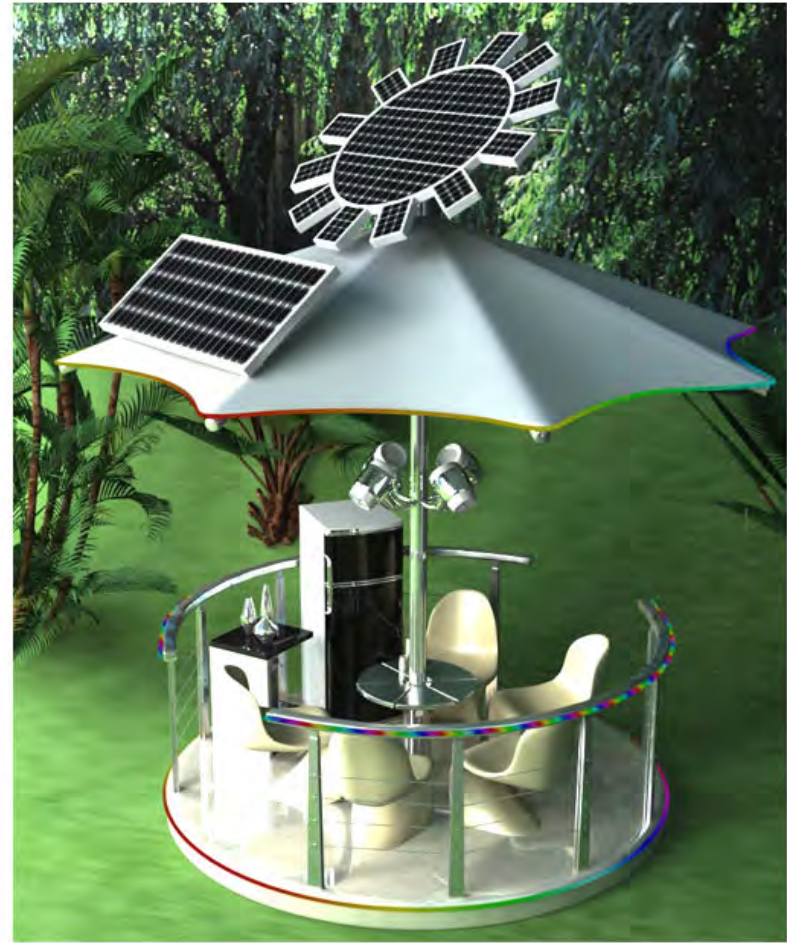

## Rotating Pavilion

## Me Town Pad

### Micro-emission Town Packaged Design Solution

Provides an intelligent micro-emission town solution—solutions for energy planning, agricultural/ industrial circular economy, design/renovation of energy-efficient buildings, renewable energy applications such as solar heating and cooling, photovoltaics, and wind energy in public buildings, schools, hospitals, hotels, tourism spots, etc.; micro-emission reduces pollution and improves quality of life.

Case Study Himin Solar Valley

## Me Home Pad

### Micro-emission Home Packaged Design Solution

**Core technologies and products:** renewable energy technologies, like solar hot water system, solar heating/cooling system, are controlled by the central processing unit, visualized by large TV panel, which applies the technology of Cloud Computing and Internet of Things for Smart Home.

Case Study Utopia Garden

## Me hotel Pad

Micro-emission Plaza Packaged Design Solution

Case Study Sun-Moon Mansion

Intelligent renewable energy technologies, like solar air-conditioning, heat storage, energy-efficient windows&doors, PV lighting, geothermal, are controlled by the central processing unit, visualized by large TV panel which applies the technology of Cloud Computing and Internet of Things.

## Me Campus Pad

Micro-emission Campus Packaged Design Solution

Case Study Renewable Energy College Town

Design/construct low-carbon and micro-emission classroom buildings, library, laboratories, zero-energy consumption stadium, staff and student dormitories, low-carbon canteens and PV lightings in the campus.

## Me Port Pad

Micro-emission Port Packaged Design Solution

Case Study Jinan International Airport

Me Pad 0216-8222222  
 Micro-emission Smart Packaged Design The future way of life

Provide low-carbon, micro-emission design and solutions for terminal buildings, zero-energy consumption navigation system, birds repellent system, zero-energy consumption square lighting and other solutions.

## Me Fac Pad

Micro-emission Factory Packaged Design Solution

Case Study 30MW Fresnel Solar Thermal Power Generation Project in Spain

Provide design and planning of energy-saving and emission-reduction factories which supply energy on its own by heating and cooling, or large-scale heat for industrial use. In brief, comprehensive energy-saving and clean energy solution for industry is provided.

### Himin Solar Valley—Micro-emission Earth World Future Valley

An exemplary micro-emission town and city for the world in the next 50 years  
(Me Town Pad demonstration)

### The Template of Future Tourism (Me Resort Pad demonstration)

**Magic Solar Journey** —In solar valley, no matter you are appreciating unique micro emission buildings, or lost in in theme park of original, or sentimentally attached to the magic solar PV crafts, or place yourself in the original ecological bars, you can control the time and route, and enjoy being close to nature original ecological beauty, even in green five-star hotel---the micro-emission hotel, enjoy green zero carbon cook delicious--solar cooking baked four styles, for your choice.

## The Future Convention and Exhibition Centre

The world's first micro-emission International Convention and Exhibition Centre, as the main Conference venue of the 4th ISCI, can accommodate 5,000 people as well as show renewable energy technologies in full view. Thus it becomes a preferred venue for international low-carbon summits, seminars and new product release.

## The Micro-Emission Hotel Clusters

The world's largest solar hotel community contains low-carbon three-star hotel, micro-emission five-star hotel, zero-carbon /plus energy hotel and seven-planet solar villas.

### The Future Domestic Energy

3G solar system – five-star domestic hot water center

Unique solution design of solar hot water, solar heating/cooling, solar swimming pool and so on

### The Future Garden of Zero-Energy Integration

Combining photovoltaic lighting, solar garden light, solar fountain and solar rotation pavilion, realize lighting, garden beautification for an organic whole,

### The Future Light

The perfect combination of solar technology and art makes brightness become the scenery. Urban road lighting, PV road and yard lighting, PV sculpture lighting systems, BIPV lighting, independent PV power stations.

### The Future Windows & Doors

#### Medn Energy-saving Windows&Doors

micro energy consumption, micro-noise, micro-dust and micro-attenuation  
 Replacement of windows and doors is equivalent to replacement of new house

**Nature Enjoying**  
 Enjoy Nature Cook and enjoy natural yummy food  
 Sublimate the mood, integrate with the nature,  
 return to simplicity.

**Garden Adorning**  
 Adorn Garden A sculpture marks the sunshine  
 Flashing lights decorate garden evening

**Fashion Leading**  
 Lead Fashion Advocate zero-carbon emission life,  
 naturally restorative lifestyle Lead global fashion

The Himin SMAN of hot water system, through the cell phone connection network and solar control instrument, realizes the remote control of the domestic hot water system real time. Check the water temperature, water level and available water capacity and other instant messages and historical data, start each function setting, you can inquire the data of domestic energy saving and emission reduction and the green energy saving ranking data at any time. No matter where you are, the domestic hot water is under your control.

***Welcome Your Participance in Himin!***
